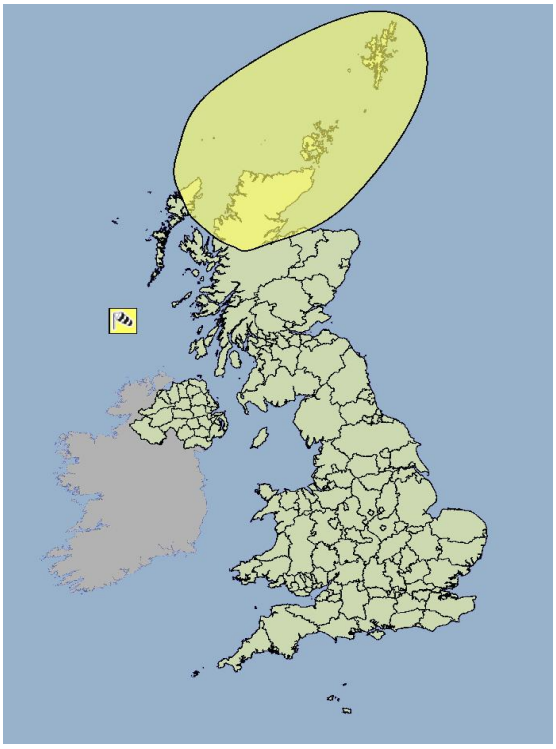
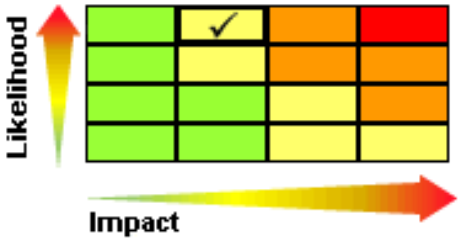
National Severe Weather Warning Service





Chief Forecasters Assessment
A deep area of low pressure is moving slowly northwards away from Scotland and passes close to western parts of Orkney and Shetland this morning before continuing further northwards. A swathe of very strong winds on its southern and eastern flanks have brought gales and severe gales to parts of Scotland overnight and will clear the Scottish mainland by mid-morning. Across Orkney and Shetland, however, these very strong winds will persist a little longer, high winds easing across Orkney by late morning before easing over Shetland during the mid to late afternoon.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **04:00 on Sun, 27th Mar 2016** until **14:00 on Sun, 27th Mar 2016**

A swathe of very strong southwesterly winds currently affecting northern Scotland with gusts of 65-75 mph will clear mainland Scotland by mid-morning and Orkney by the late morning before finally easing across Shetland later this afternoon. There is a small risk isolated gusts of 75-80 mph affecting Orkney and Shetland.

Please be aware of the risk of some mainly low levels of disruption to travel, but also to other Easter holiday activities.
